## Step 5:

Scroll down to line that say "remote nnn.nnn.nnn 34512" (spaces are needed between remote and ip number and ip number and 34512

put proper ip number that was obtained from location(<u>www.whatismyip.org</u>) at site that you want to connect to. Do not edit line that has hash mark at beginning "#"

Step 6:

Click connect and it will then require Mac admin password

That's it
