

## How to Add SdCloud Calendar to iPhone

1. Login to **SdCloud**
2. In the top left-hand corner, click the word 'Files' to open the app menu where you then select '**Calendar**' (phone displays may vary, you may only see an icon for 'Files')
3. In the bottom-left of the screen, click '**settings & import**'
4. Highlight and **copy** the contents of the box below 'iOS/OS X CalDAV address'
5. Launch the **Settings app** on your iPhone or iPad.
6. Tap on **Accounts & Passwords** (actual menu names very depending on iOS version)
7. Tap on **Add Account...** near the bottom

8. Tap on **Other**.
9. Tap on **Add CalDAV Account** under the **Calendars** section.

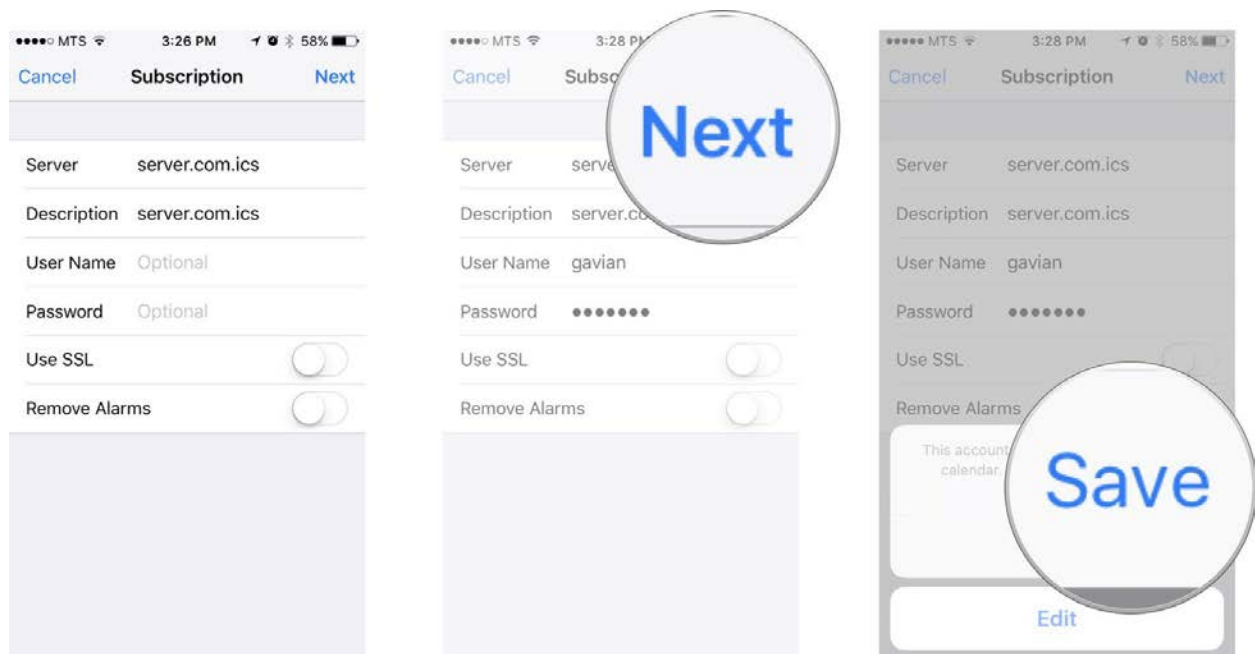

10. Paste in the server location of the calendar that you copied from SdCloud.

11. Enter your SdCloud username and password and a description

12. Tap the **Next** button.

13. Tap the Save button.

That's it, the subscribed Calendar will now show up in the Calendar app.
